

HOW DOES MILK GET FROM FARM TO YOU?

STEP 1

The cows are milked on the farm, the milk is put into a chilled tank ready for collection

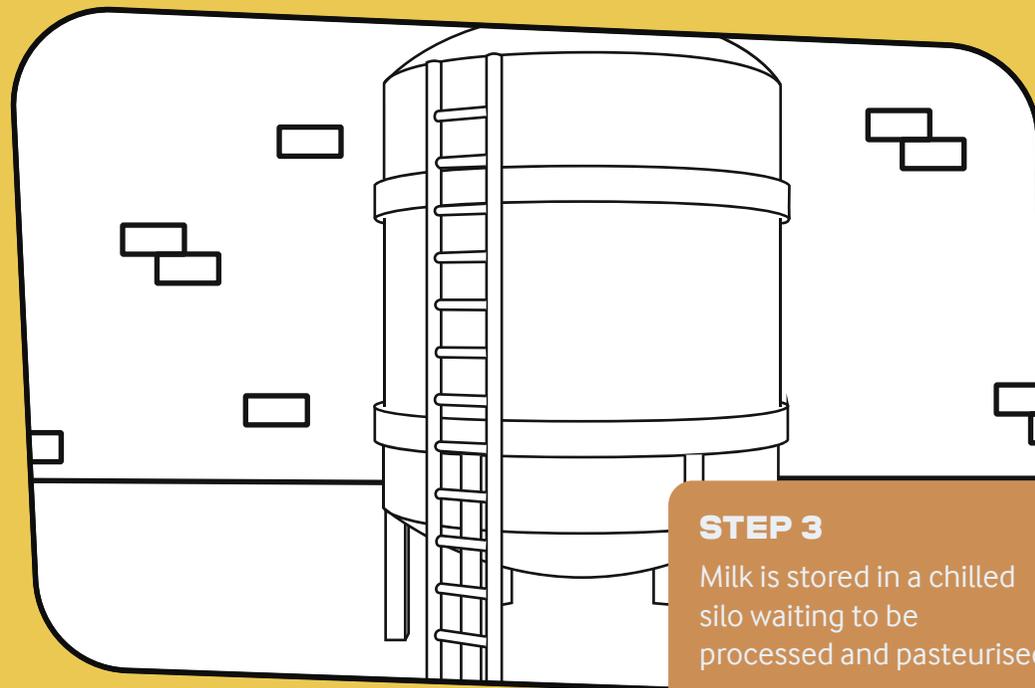

STEP 2

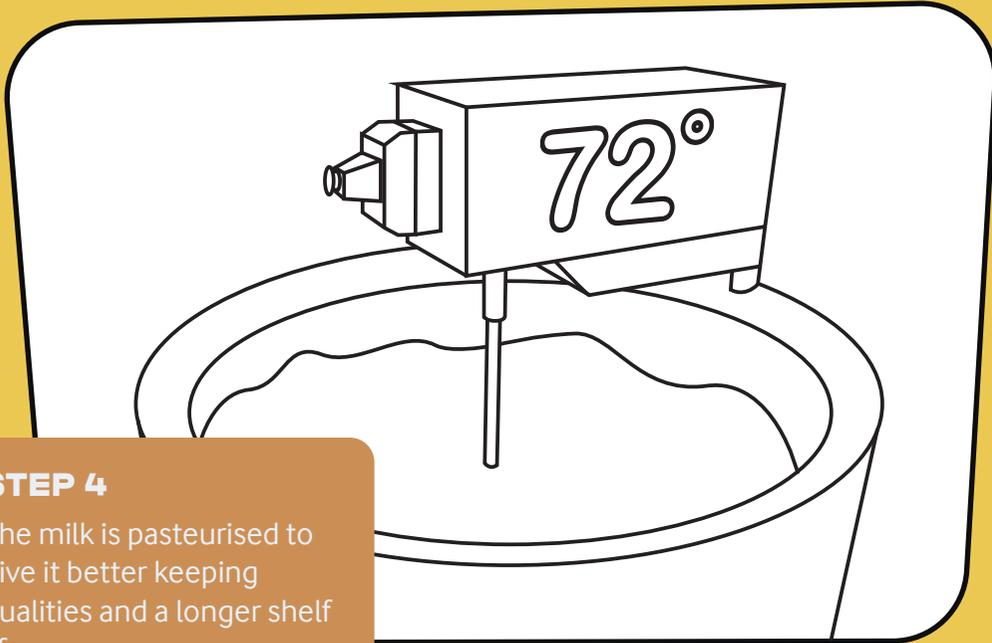

The milk is then collected by a tanker and delivered to a dairy

STEP 3

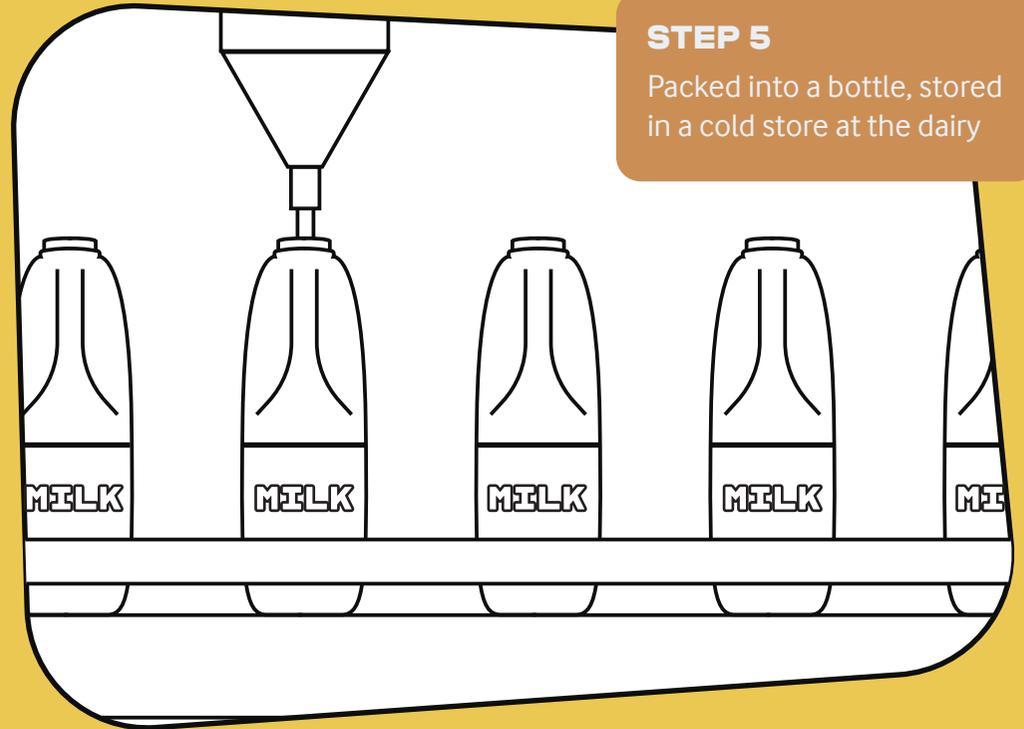

Milk is stored in a chilled silo waiting to be processed and pasteurised

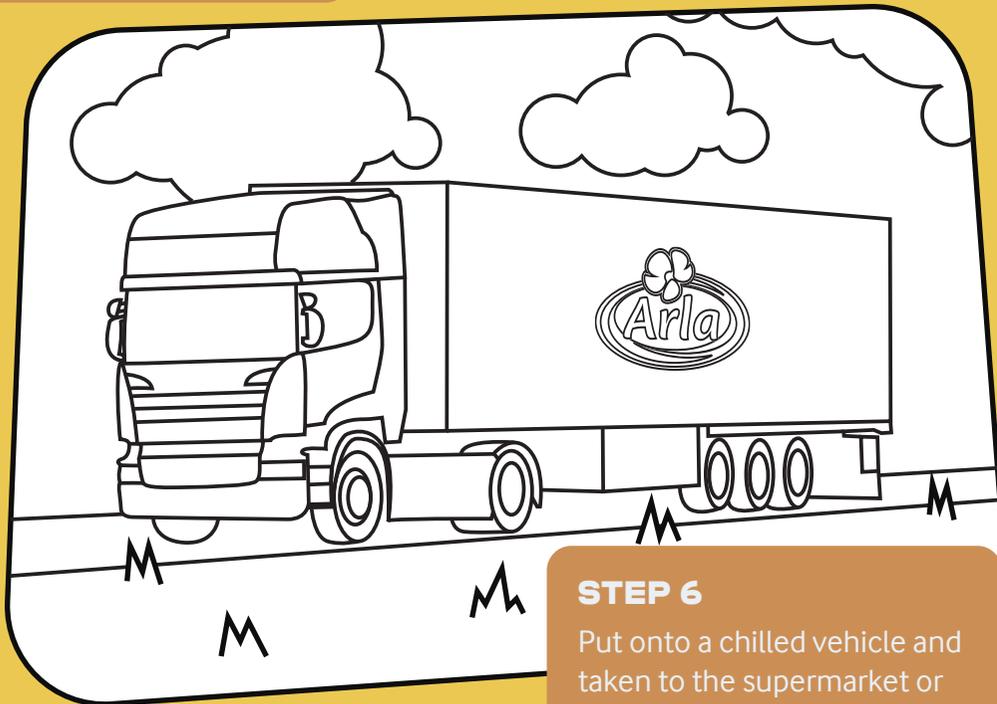

STEP 4

The milk is pasteurised to give it better keeping qualities and a longer shelf life

STEP 5

Packed into a bottle, stored in a cold store at the dairy

STEP 6

Put onto a chilled vehicle and taken to the supermarket or local shop

STEP 7

Bought by you to enjoy at home!
